

## On-line data collection portal for Early Years Education Providers to record and share Child Assessments

**Sentinel's on-line solution enables local authorities to receive, store and monitor pre-school EYFS Child Assessment data efficiently and securely.**

Flexible and adaptable, our portal provides a direct secure link between local authorities and individual early years education providers. It provides a secure, on-line application for providers to enter child assessment data each term, plus staff qualifications and training details. Development information can be integrated with other data sources, such as NHS Health Visitor Assessments.

Held centrally in the authorities Sentinel Data platform, the data is available for integration into other services such as Supporting Families (Phase 3) to address a critical data gap in family assessment information.

Key features and benefits include:

- > **Configurable rules-based technology:** Tailor screens, processes, and frequency to suit the relationship each authority has with their EY Education Providers
- > **Data quality and timeliness:** On-line forms to collect information that is automatically checked and validated before it is shared with the authority
- > **Wider data sharing:** Combine with other secure portals for Social Services, Children's Centres and Health Visitor Teams to create a collaborative view of pre-school children
- > **Data Integration:** Part of the wider family of Sentinel Portals, able to share data with other Portals across the Sentinel Data Platform as well as Ofsted Data feed to control the registered provider lists and any Education Systems to provide a Single View of pre-school children
- > **Automatic alerts and messages:** Authority and provider users can see if entries are late or if a child's assessment data is a potential cause for concern
- > **Absolute visibility:** Dashboards and drill-down screens to show overall status at area or setting levels, as well as providing individual child details
- > **Monitor children's progress and service provision:** Flexible features to view development or children and performance of providers
